- Contact Diamonds
- Diamonex
- Diavik
- Falconbridge
- Gem Diamonds
- Kensington
- Peregrine
- Shore Gold
- Snap Lake
- Stornoway
- Tahera
- Tiffanys

A Carat and Value Profile

Diamond Pipeline 2006 (\$bn)

Rough Production / Producers

Diamond Production (carats)

World Diamond Production 2006

Share of Goods to Market

* = Contracted Purchases
De Beers excludes Diamdel open market purchases

WWW International Diamond Consultants Ltd.

Loss of the Halo Effect, the New Paradigm

- John Kay, Financial Times, ‘Leaders should say good bye to their Haloes’
- The changing paradigm
 - De Beers diminishing role, destruction of the old comfort zone
 - Producer Power, fragmentation of supply decisions
- New Paradigm
 - Supply / Demand scenario
 - Significant restructuring in the pipeline

De Beers Market Share

(production + purchases)

De Beers

- Loss in Market share
- Failure of SoC to grow demand
- Deterioration in selling mix, no Russian intake
- Loss in Margin- Debswana share of profits from 25% to 15%
- 2006 Accounts 50% drop in underlying earning despite first full year of VAS and record production
- Increased regulation of SoC- Jayam v DTC + increased powers to Ombudsman
- Producer Power- proliferation of DTC's – erosion of discretionary power

De Beers

- Canada
 - Snap Lake
 - Victor – challenges
 - Shore / FALC
 - Mountain Province - delays

Southern Africa

- Botswana
 - DTC to Gaborone by 2008
 - Polishing Factories
 - New Mines outside Debswana?
- Namibia – prolonged negotiations
- South Africa
 - *The State Diamond Trader*
 - New Diamond Act
- Angola
 - Considerable promise but complicated

Russia

- EC question
- End of 2008 no more business with De Beers
- De Beers agreed to ruling as trade off to SoC
- Russian goods are important to the DTC mix
- Canadian production cannot replace these goods
- Success of Russian tenders
- Aggressive moves into Africa

Rio & BHP

- Rio
 - 2006 introduced fixed price contracts for Argyle production to secure expansion
 - significantly lowered prices on Argyle production
 - Have been holding goods back
 - In contrast to De Beers raised prices in 2007 together with Alrosa
- BHP
 - Ekati passed its prime
 - No significant other sources of rough
 - Angolan potential
- Aber
 - Marketing company 'not' a producing company

Prices

- 2005
 - Speculation pushed rough prices too fast
 - There was a shortage of rough
 - Over capacity of manufacturing after De Beers liquidated stock
 - Massive reduction in Argyle stones
- July '05 announced H2 target was to meet H1 levels
 - 2005 H2 over sold
 - Impact on liquidity as sightholders pay cash
- Gary Ralfe left at end of record year

Rough Prices

- 2006
 - Correction in rough prices continued throughout the year
 - Speculation had pushed rough prices too fast
 - Over capacity of manufacturing after De Beers liquidated stock
- 2007
 - DTC announces less production for 2007
 - DTC implemented a price reduction in January which has partly stimulated the market again
 - DTC raise prices at the March Sight, strong premiums continue.

Supply / Demand Scenario

Associated Companies

- Estimates are based on percentage GDP spent on diamond jewellery

PolishedPrices.com

- Increased acceptance in the market
- The ONLY REAL polished price list
- Reuters
- Bloomberg
- ABN Bank- sponsors Index
- A platform for others
 - Futures market?

Price Indices

World Production Forecast

(2007 on in 2007 dollars)

Supply vs Demand

Rough Price Forecast

Emerging Markets

- India has grown at 20-30% over the last few years but will slow as it reaches levels of Japan's spend at the height of its bubble.

Emerging Markets

Unconstrained Demand

- “If demand were not constrained by supply demand would reach 50 million polished carats by 2020, up from 26 million today”
 - Richard Platt, WWW Diamond Forecasts td.

Issues that could affect Price Changes

- Increase in rough production
 - Technology
 - New plants
 - Russia
 - Angola
- Bank Financing – need for financial instruments
- Synthetics
- Conflict diamonds / NGO issues
 - Di Caprio movie
- Industry restructuring

Summary

- Current liquidity problem
- Increased volatility, prices, industry structure...
- Significant pick up in rough, polished continues to lag
- Supply forecast to be fairly stable
- Long term prices should rise
- New Paradigm of flux and new opportunity
